

My name is Charles Littleton, I am a 40 year old white male. I am serving a 12 year sentence and over the past 4 years I have really questioned a few things 1. Is there really a God? 2. Is there really life after death? Is there more to life than just living, eating & breathing? I have been alive for the last 15 years or so of my life. Not a perfect one I might add. In fact I had all but given up on faith & religion as a whole. My life has not been a unfortunate or bad one. I have lived under the radar and on and off the grid and in and out of society for most of my life. I have been all over the country and met many different people in my short life. The Best of which was my Beautiful Wife. Now ex wife. My wicked ways and path of nothingness & self destruction has cost me the 2 most precious things a man could ever have. I'd Perfect, Beautiful loving wife and my Beautiful Daughters. My life has been fast to say the least. But More fun and free than most will ever experience. I have many memories. Good & Bad as well as many regrets. When my life came to where it is now I truly was willing and ready to end it. I mean kill my self. I have fought with depression, stress, anxiety and many other mental issues over the past 4 years. I was to that crucial point of live or die its

all the same. I finally made the decision to
kill myself at the most convenient time so as not
to cause a fuss. The week of decided that I met
Mr. Melvin Morse. We got along ab I guess. We
talked a little more each day for about 2 weeks. He
pointed out how raticable my depression was and I
explained my situation. So I opened up to him a
little at a time as he caused me to reevaluate
my wiccan faith and, well, my faith period. I asked
questions he gave answers, he asked questions I
gave answers. I was actually honest with him because
nothing mattered any more any way. Over a short
time he convinced me to give life another chance.
he then started sharing his knowlege of the after
life with me and still I had "some" doubts. So he
talked to me about my ability to know everything
in the Universe if I would just open up and listen
to my inner self. I sure as hell thought. Well This
Old Man is about as crazy as They come... So I
thought "..." I did a few of his exercises and I
was stupified by the results. His ability to ~~to~~
get me inside of myself to see, hear and feel
things that I would have never believed if it
wasnt happening to me is un real and surreal at
the same time. Mr Morse gave me back my
faith. My will to live. His ability to prove to
me that the Universe and all things in it

truly are connected caused the inner sparks inside of me to ignite into a blazing inferno of hope, joy, faith, peace. My life has changed in so many ways for the better since meeting Melvin. I am at peace with myself as well as the world around me. My ability to reclaim my life from the inside and my ability to be silent and listen, to meditate, to give thanks have returned so strong. I am truly new inside thanks to the knowledge I learned from Renato Veiviny and other exercises I learned from Melvin. I am happy again. I am no longer a danger to my self or anyone else and have completely gotten off of my depression meds. I recommend anyone with doubt or the next or the last life sit still and fully experience this one. We are so much more than just People. We are magical, spiritual beings that are created to live, to laugh, to love and to share all of our selves with the whole Universe.
